

WIND ENERGY CORPORATE PPAs ARE BOOMING

SINCE 2013 CORPORATES HAVE CONTRACTED 13.5 GW OF WIND ENERGY THROUGH PPAs

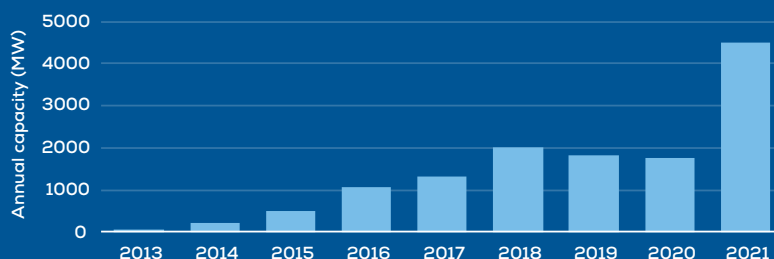

This is equivalent to the combined total wind energy capacity of the Netherlands and Belgium. 2/3rds of all corporate PPAs (Power Purchase Agreements) signed so far were with wind.

2021 WAS A RECORD YEAR FOR CORPORATES BUYING WIND ENERGY

Corporates signed a record 4.5 GW of wind energy capacity through PPA deals in 2021.

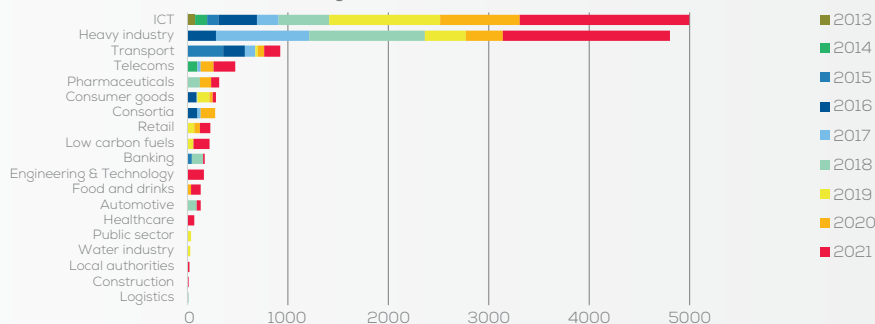

Wind energy-based corporate PPAs by year

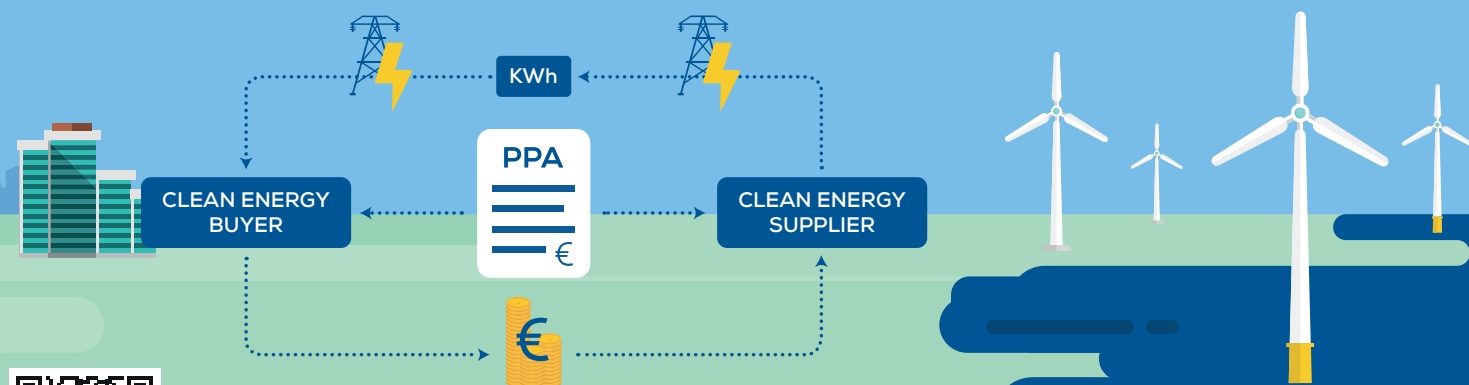

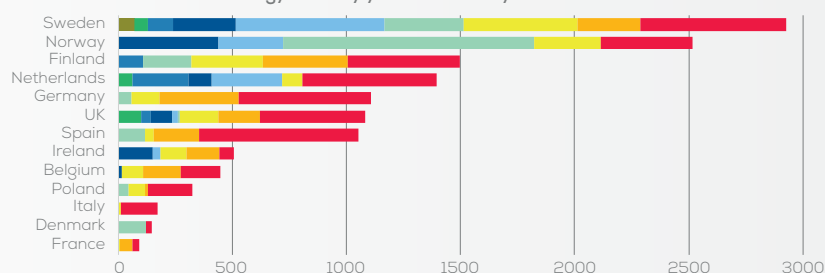

KEY TRENDS:

- ICT have contracted the largest volume of wind PPAs, followed by aluminium smelters and chemicals companies.
- PPAs are being signed in more countries. In 2021, wind energy PPAs were signed in 13 different countries in Europe.
- Offshore wind PPAs have taken off since 2018. Now more than 2.5 GW of offshore wind has been contracted through PPAs.
- Sweden, Norway and Finland lead the way in Europe with over 50% of wind PPA volumes signed in these three countries alone.
